I don't believe we can get around it. As Helen suggested prepare a paragraph on why this is needed and why it is mission critical. John or Walter argues our case to Donna and the RA (that's assuming that there's any money anywhere to put on the contract).

Subject: Funding for Cabo

Angela,

We are starting sampling activities at Cabo next week. Mobilization occur and everything is up and running. I just got a message from CDM stating that they have enough PLOE and funds until the end of April and they are requesting an increase. I forwarded the info to Helen and please see her response below.

Fact: We need funds for Cabo.

Fact: Sequestration means no funding

Question: How do we go around and about this hurdle?

Please advise

Denise

Denise:

We are under a sequestration. At this time we are unable to exercise any options to add additional funds into the contract without SRO approval. There is insufficient funds currently on the contract to increase the funding for your work assignment. We also need SRO approval for all expenditure limit increases over \$3000 and need to justify that this is mission critical.

Helen

FYI.

We are starting sampling next week.

Subject: electricidad

Buenos días Denise,

I am very pleased to report that the electricity was hooked up this morning – that is a big accomplishment!

Just an FYI, that an expenditure limit increase will be needed for Cabo Rojo by the end of April. We will start burning lots of hours and dollars as the field work starts and the subcontractors are also active on the project. I estimate that we need an EL increase of 1100 PLOE and \$400,000. Can you please communicate this to Helen Eng?

Many thanks,

Susan
